

# LOQT : DO NOT USE THIS FEATURE IN LensWare

Last Modified on 08/01/2021 2:56 am EST

## LOQT : DO NOT USE THIS FEATURE IN LensWare:

Dear colleagues,

In the order entry screen of LW, we have a new combobox filled.

Before today, it was empty.

Please NEVER USE any of the content. The route is determined by the type of lens chosen.

Why is this now available? Well, we can now benefit in Advance search this field to have an overview of all orders on a specific route. Only disadvantage was that it was also available in order entry.

Only here in advance search this option may be used for looking up !

Please put this on the KB.

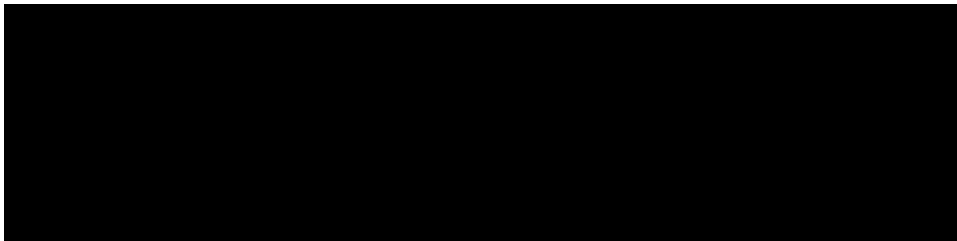

Best regards, Pedro
